May Happenings @ the Niagara Falls Museum

'Water for Life' the newest exhibit for the City of Niagara Falls Museums, writes Clark Bernat

Water for Life is the newest exhibit for the City of Niagara Falls Museums. The exhibition opens on May 12 and features 37 artists from 18 countries, displaying their works with a focus on the theme of water and the fact that water is the essence of life. These distinguished artists were selected based on their recognition by international art critics and their award-winning works. The Niagara Falls Museums are very excited to be hosting this interesting exhibition this summer.

Clark Bernat is museums and culture manager for the City of Niagara Falls
